

PDF-to-Excel

Auditable Conversion Proof

A synthetic four-page service-record PDF converted into a typed, filter-ready workbook with source order, page reconciliation, formulas, and an explicit issue register.

SOURCE	OUTPUT	READY	REVIEW	TOTAL DELTA
4 pages	36 rows	35	1	\$0.00

Workbook overview

	A	B	C	D	E	F	G	H
1	PDF-to-Excel - auditable conversion proof							
2								
3	Synthetic four-page source converted into ordered, filter-ready records with page-level reconciliation and an explicit issue register.							
4								
5	Source pages		Extracted rows		Rows ready			
6								
7	4		36		35			
8								
9	Rows for review		Source total		Page total delta			
10								
11	1		\$8,822.95		\$0.00			
12								
13	Conversion controls							
14	1	Source order	Every row carries source page and source order.	4	No guessing	Unclear values remain blank and enter Issues.		
15	2	Wrapped text	PDF line breaks become clean single-line cell text.	5	Typed fields	Dates and amounts remain sortable numeric values.		
16	3	Page QA	Counts and amounts reconcile page by page.	6	Filter-ready	Headers, tables, filters, and frozen panes are applied.		
17								
18	Scope	Synthetic portfolio evidence only. Production work begins after file inventory, schema approval, and a funded representative sample.						

The summary is formula-driven from the extracted records and page QA sheets. The one deliberate unclear token is not silently repaired.

1. Synthetic source with realistic extraction friction

The source fixture repeats the same table structure across four pages, includes wrapped descriptions, typed dates and amounts, and one deliberately unclear unit-rate token. It contains no customer or platform data.

Synthetic Service Records

Portfolio fixture - Page 1 of 4. All names, references, and values are fictional. Wrapped descriptions and one deliberate unclear token test extraction QA.

Record ID	Date	Department	Reference	Description	Qty	Unit Rate	Amount
SR-0001	2026-06-01	Operations	REF-2026001	Preventive maintenance and calibration for mobile scanner fleet	1	42.50	42.50
SR-0002	2026-06-02	Field Services	REF-2026002	Warehouse inventory reconciliation and label replacement	2	95.00	190.00
SR-0003	2026-06-03	Customer Care	REF-2026003	Customer onboarding records review - batch 07	3	58.00	174.00
SR-0004	2026-06-04	Logistics	REF-2026004	Safety inspection and compliance note consolidation	4	120.40	481.60
SR-0005	2026-06-05	Operations	REF-2026005	Regional dispatch support - Sao Paulo service desk	5	73.25	366.25
SR-0006	2026-06-06	Field Services	REF-2026006	Invoice archive cleanup for Cafe branch records	1	42.50	42.50
SR-0007	2026-06-07	Customer Care	REF-2026007	Quarterly meter reading validation and exception tagging	2	95.00	190.00
SR-0008	2026-06-08	Logistics	REF-2026008	Equipment return intake and serial-number verification	3	58.00	174.00
SR-0009	2026-06-09	Operations	REF-2026009	Service request triage with multiline source note retained	4	120.40	481.60
Page total							2142.45

- Repeated headers are identified and excluded from data rows.
- Cell-internal line breaks are normalized without changing the text sequence.
- Every record keeps source_page and source_order provenance.
- The printed page total is extracted independently for reconciliation.

2. Structured output with visible QA

The output uses typed dates, quantities, rates, and amounts. Recalculated amounts and deltas are formulas, while uncertain source content is preserved in QA Note and Issues.

	A	B	C	D	E	F	G	H	I	J	K	L	M	N
1	Source Page	Source Order	Record ID	Service Date	Department	Reference	Description	Qty	Unit Rate	Source Amount	Recalculated	Delta	QA Status	QA Note

Control	Verified result
Record inventory	36 of 36 source records, in original order
Wrapped cells	4 cells normalized to single-line values
Page reconciliation	4 of 4 pages have zero amount delta
Review boundary	1 unclear token left blank; 1 Issues row opened

3. Delivery map and acceptance boundary

The proof separates source evidence, extracted data, quality controls, and unresolved issues so another operator can audit the conversion without the original builder.

Workbook sheet	Purpose
Overview	Formula-driven counts, ready/review totals, and amount reconciliation
Extracted Data	Filter-ready records with source provenance and formula checks
Page QA	Source-vs-output row counts and amount totals by page
Issues	Unclear values, source token, action status, and review note
Source Inventory	File, pages, source hash, extraction method, and total

Production acceptance boundary

- Inventory the files and page count before accepting the full conversion.
- Approve the target columns and one representative output before bulk work.
- Flag handwriting, image-only scans, merged layouts, and unreadable tokens for revised scope.
- Accept on file coverage, agreed schema, row consistency, page sampling, and explicit issues - not an unsupported perfect-OCR claim.
